200 Words describing your work (Research Method/Statement):

Amazon was made in a group of photos exploring the style of New Objectivity as it relates to modern styles and practices. Objects were chosen with characteristics of irrelevance and the mundane. Large format negatives were shot and developed and scanned to make a digital file. The digital file was then manipulated to accentuate the interaction of the objects with their purpose and reality. *Amazon* highlights boxes from online commerce and shipping labels affixed to them. These materials are essential for a modern convenience but are only a means to an end for the vendor and purchaser.
